FOREWORD

This is the second in a series of statistical reports prepared by the Department of State Planning's Office of Planning Data based on data from the 1980 decennial census. The Department of State Planning has assembled these data to provide an historical base to assess current and projected trends.

The first report in this statistical series (Publication 81-21) displays trends in population and housing for the State, planning regions, and political subdivisions.

This publication provides information on population trends for the counties, minor civil divisions and municipalities of the State. Maps and tables show trends in total population and population by race. Included are statistics on the percent change in population, average annual rate of population growth, percentage share of population, population density, and the percent of the population that is white and non-white.

The next report in this statistical series will examine in more detail changes between 1970 and 1980 in population and housing patterns for the State, planning regions, and counties. The report will be based on the analysis of comparative data from the 1970 Census 1st Count Tape File, and the 1980 Census Summary Tape File 1A.

REPORT ORGANIZATION

Sections

The body of this report consists of eight sections, each of which contains maps and tables summarizing census data on population. Section I includes data for the State and its political subdivisions. The succeeding sections (II through VIII) include data for the counties, minor civil divisions[1] and municipalities in each of the Department's Planning Regions. The eight sections and their component political subdivisions are:

Section I. State of Maryland

Section II. Baltimore Region - Anne Arundel, Baltimore City, Baltimore County, Carroll, Harford, Howard

Section III. Suburban Washington Region - Montgomery, Prince George's

Section IV. Western Maryland Region - Allegany, Garrett, Washington

Section V. Frederick Region - Frederick

Section VI. Southern Maryland Region - Calvert, Charles, St. Mary's

Section VII. Upper Eastern Shore Region - Caroline, Cecil, Kent, Queen Anne's, Talbot

Section VIII. Lower Eastern Shore Region - Dorchester, Somerset, Wicomico, Worcester

---

[1] Minor Civil Divisions (MCDs) are the primary subdivisions of counties and in Maryland are largely synonymous with Election Districts. The 1980 MCD data displayed in this report for the twenty-three counties are from the U.S. Department of Commerce, Bureau of the Census, Census of Population and Housing: 1980, PHC80-V-22, Final Population and Housing Unit Counts. These figures may differ from the election district figures for counties found in the Maryland Department of State Planning, Maryland Precinct Population Data for Redistricting and Reapportionment (Revised Report), Publication 81-22. The reasons for these differences are explained in the methodology section of the redistricting population report. The 1980 MCD (ward) data in this report for Baltimore City are from the redistricting population report since population data by ward are not available from the Census. Appendix A provides a list by county of those minor civil divisions and election districts with different population counts.

Maps and Tables [2/]

Each section of the report contains maps and tables on total population and population by race (white and non-white).

At the beginning of each section is a map. In Section I, the map is of the State showing the counties and Baltimore City. In Sections II through VIII, the map is of the region showing the counties and minor civil divisions.

Following the initial map, each section has two maps showing intercensal change in total population for the component geographies (political subdivisions in the case of Section I and minor civil divisions in the case of Sections II through VIII). The maps display:

1. Percent Change in Population 1960-1970.
2. Percent Change in Population 1970-1980.

The total population maps are followed by four tables showing census data and intercensal change statistics on total population for the period 1930-1980. In Section I the tables are for the State and its political subdivisions and in Sections II-VIII for each county in the region and its minor civil divisions and municipalities. The tables show:

1. Population 1930-1980 and Percent Change.

[2/] The population data and statistics for the minor civil divisions (districts in the counties and wards in Baltimore City) are based on counts for these geographic units as provided in each of the decennial censuses. Minor civil divisions have undergone some boundary changes in Maryland between 1970 and 1980. The figures shown in this report reflect the boundaries as they existed at the time of each census. In Allegany County, certain districts are combined to obtain comparable geographic areas. In the other jurisdictions, this is not done, since the population counts are large enough and the boundary changes small enough not to result in statistically significant differences. Appendix B lists the minor civil divisions for which boundary changes occurred between 1970 and 1980.

2. Population 1930-1980 and Average Annual Growth Rate.[3]
3. Population 1930-1980 and the Percentage Share of Population.
4. Population 1930-1980 and Population Density.

The displays on total population trends are followed by maps and tables on population by race for the component geographies. The maps display:

1. Percent Change in White Population 1970-1980.
2. Percent Change in Non-White Population 1970-1980.

The maps on population change by race are followed by four tables showing census data and intercensal statistics on population by race for the period 1960-1980. In Section I the tables are for the State and its political subdivisions and in Sections II-VIII for each county in the region and its minor civil divisions and municipalities. The tables show:

1. Population by Race 1960-1980 and Percent Change.
2. Population by Race 1960-1980 and Average Annual Growth Rate.
3. Population by Race 1960-1980 and the Percentage Share of Population.
4. Population by Race 1960-1980 and Percent White and Non-White.

Appendices

Following the eight sections with their respective maps and tables are two appendices:

Appendix A. Differences in Minor Civil Division and Election District Population Counts by County, lists those MCDs and EDs for which the population counts are not the same in 1980.

Appendix B. Minor Civil Division Boundary Changes, 1970-1980, lists by county those minor civil divisions for which boundary changes occurred between 1970 and 1980.

Appendix C. Data Source Guide, lists the sources of data used in the preparation of this report.

3/ The average annual growth rate (AAGR) is analogous to a bank's interest rate. The AAGR is the annual rate at which the population of a jurisdiction has to grow each year in order to obtain the actual population observed ten years later.
